## PROJECTS

---

**Swapit.co.in** [[Live Project](#)]

**Tech Stack:** ReactJS, Redux, JavaScript, API, NodeJS, ExpressJS, MongoDB, Tailwind CSS

- I am leading as a Front-End Engineer collaborating closely with a Backend Engineer.
- Swapit is a Modern exchange and barter website, featuring **login, signup, exchange, filtering, sorting, searching, messaging** and **communication** along with an **admin page**.
- My role centers on **designing** and **developing** the product page from inception, encompassing the implementation of features such as **sorting, searching, filtering, login, signup, product exchange, admin page, pagination, product view, checkout, add to wishlist** and more.

**CorporX** [[Source code](#)]

**Tech Stack:** ReactJS, Redux, JavaScript, API, Tailwind CSS

- Designed and developed an individual project in the span of 6 days, corporX allows users to refer and earn by investing small amount. Users can buy products from the store using earning balance.
- Featuring responsive design, **user authentication**, shopping functionality, **pagination, single-product view, product checkout**, and capabilities for **adding** to and **removing** from the cart and wishlist.
- [See project here](#)

**Puma-Clone** [[Source code](#)]

**Tech Stack:** JavaScript, HTML, CSS, API

- Puma is a multinational corporation that designs and manufactures athletic and casual footwear, apparel, and accessories. It is one of the world's leading sportswear brands.
- Designed and implemented features similar to those found in an e-commerce website, including **user authentication, single product view, pagination, searching, and filtering, login, signup, product view, add to cart, add to wishlist**.
